EDUCATION

Degree	Institute/Board	CGPA/Percentage	Year
Bachelor of Engineering	Easwari Engineering College	8.2/10 (Current)	2024-Present
Senior Secondary	Chinmaya Vidyalaya Sr Sec School, Virugambakkam	90.8%	2024
Secondary	Chinmaya Vidyalaya Sr Sec School, Virugambakkam	90.2%	2022

PROJECTS

- Digital To Analog Converter**
Self Guided Project
 - Designed and implemented a 4-bit Digital-to-Analog Converter using an R-2R resistor network to convert binary inputs into proportional analog voltage levels.
 - Validated output through Arduino and LM358 operational amplifier buffering, demonstrating accurate staircase waveform generation and digital-to-analog conversion principles.
- Anti Sleep Alarm System**
Self Guided Project
 - Developed an ESP32-based Anti-Sleep-Alarm system integrating eye-blink sensing and Wi-Fi communication to monitor user drowsiness in real time and implemented automated alert mechanisms to trigger alarms and transmit notifications, enhancing safety in fatigue-critical scenarios.
- Automated Document Formatting and Structuring System**
Self Guided Project
 - Developed a browser-based tool to extract and restructure unformatted DOCX content into standardized formats.
 - Enabled real-time preview and instant file regeneration, reducing manual formatting effort.

TECHNICAL SKILLS

- Programming Languages:** Python, C and C++
- DataBases:** SQL
- Software/Tools:** Visual Studio, Jupyter, Google Colab
- EDA Tools:** Tanner EDA, Altium 365
- Soft Skills:** Communication, Leadership, Teamwork, Creativity, Accountability

KEY COURSES TAKEN

- AI/ML courses:** Fundamentals of AI from Cisco and Qualcomm Academy
- Architecture Courses:** RISC-V Introduction –RISC-V International
- Computer Science Courses:** C,C++ Programming- Orange Institute

MISCELLANEOUS

- Symposium Participation:** Designed a fire extinguisher robot using AutoCAD, focusing on mechanical layout and functional deployment concepts
- Hands-on Learning:** Practiced embedded systems, IoT integration, and sensor interfacing through self-driven projects
- Technical Exploration:** Actively learning EDA and core electronics concepts (VLSI, PCB design tools)
